

Auburn, Cal.  
Dec. 1st. 1891.

Dear Mr. Watson:-

Returning, after  
a five weeks visit in  
San José, I found  
your kind note and  
the determination of  
plants awaiting me.

*Arabis* (36) I  
found in our place.  
Had not detected it  
before till this Spring.  
*Linnaea pumila*, Gray.  
is from Arizona, but

all the others except  
the following I found  
in or near Auburn.  
*Ranunculus alismifolius*,  
Beyer, Lake Tahoe.  
*Polemonium humile*, Willd.  
var. *pulchellum*, Summit.  
*Phacelia humilis*, T. & G. "  
*Streptanthus campestris*,  
I fail to find among  
my numbered specimens,  
but it is undoubtedly  
the one I have from near  
Jona Hill - Placer Co. -  
I remember that I  
thought of sending it

because I could not  
decide upon the species.  
*Lychnis lithospermum* grew on  
our place, and *Bidens*  
*fendosa* in Auburn  
Ravine.

Thanking you most  
kindly, I remain  
Sincerely yours,  
Mary E. Pulsifer Ames.
